Profile

I have experience updating legacy applications, maintaining existing systems, and designing and building new products. Most of my professional career has been with PHP, however, I have also worked with JS, Ruby, and Python. I have a strong grasp of RESTful API Design, Design Patterns, TDD, and CI / CD. Many of my projects have also required some DevOps work with AWS products. When approaching problems, I try to focus on what the business or client really needs to succeed.

Community

In addition to my technical skills, I am also an active community member and speaker. I co-organize my local user group (NashPHP) and am one of the founding organizers for the upcoming SouthEast PHP Conference (Fall 2018). I have spoken at my local PHP and Python user groups as well as at PyTN (2016) and Coder Cruise (2017).

Experience

ATATA, Senior Software Engineer

Sept 2016 - July 1017

Worked as a contractor for several companies including StoryBrand and Dave Ramsey, both on-site and remotely. Technology stacks included PHP, Laravel, Node, Ruby, Rails, MySql, AWS, and Heroku. Project work included adding features to existing systems and building new applications.

Patient Focus, Software Engineer

July 2015 - Aug 2016

Responsible for maintaining legacy PHP applications, adding new features, and building entirely new services. Driving force behind a re-architecture of the core application. Implemented PSR standards, automated tests, and modern design patterns. Also implemented a custom ORM to support reporting tools.

ioStudio, Software Engineer

Feb 2013 - July 2015

Successfully saw several web properties through their entire development cycle for clients ranging from small businesses to the Department of Defense and United States Chamber of Commerce. Introduced unit testing and TDD to the development team as well as various other coding standards. Implemented service oriented API to share data and provide single sign-on across several web properties.

Languages & Tools

PHP, Ruby, Js, Python, git, AWS, Phpunit, Composer, Css, Ajax, Travis-CI, Ubuntu, CentOS, Heroku

Frameworks

Symfony, Laravel, Slim, Aura, Rails, Node, jQuery, CodeIgnighter, React

Databases

MySql, Sql Server, Mongo DB, Sqlite, Postgres

Education

Nashville Software School

Completed December 2012

Six month developer bootcamp program. Learned Html, Css, JS, jQuery, Ruby and Rails.

Belmont University

BBA, Completed May 2012

BBA with an emphasis in the Entertainment Industry, minor in Consumer Behavior. Graduated with Honors.
